To whom it may concern:

Hello ! My name is Cain Susko, and I am a student of Software Engineering at Queen's University.

I believe I would be a good fit for the position because I have thorough experience working with Python & MatLab. I have successfully completed a course on linear data analysis using [MatLab](#) as well as created a convolutional neural network in [Python](#).

Furthermore I would be a passionate employee because I have always had a love of learning, and data analysis is one of the fundamental forms of this. Furthermore I have a strong attention to detail which would aid in the perperation of data. Additionally, I am very passionate about trains.

Thank you for your time and consideration – and I look forward to your response.

Kindly,

Cain Susko
